Product Overview

High-Performance Gasoline Engine

This 8HP gasoline engine is engineered for reliable power in demanding industrial and commercial applications. Delivering 5.3kW of power at 3600rpm, it provides a consistent and efficient energy source for equipment such as generators, water pumps, and other machinery. With its robust construction and dependable recoil start mechanism, this engine is designed to withstand rigorous operating conditions while maintaining ease of use and maintenance.

Technical Specifications

Power Output

5.3 kW

Power Output

8 HP

Horsepower

Rated Speed

3600 rpm

Engine Displacement

223 cc

Operational Features

Starting Method

Recoil Start

Ideal Applications

Generators, Water Pumps, Industrial Machinery, Power Generation
