Product Overview

Secure High-Capacity Charging Solution

This 54-bay electronic device charging and storage cabinet provides a secure and highly efficient solution for managing multiple devices simultaneously. Designed for high-traffic environments like schools and offices, it features a robust steel construction with integrated ventilation to ensure safety and longevity. The unit combines high-density storage with organized USB charging, making it an essential asset for any organization handling large fleets of laptops, tablets, or smartphones.

Capacity & Compatibility

Total Charging Bays

54 Units

Individual Bays

Compatible Devices

Laptops, Tablets, Smartphones

Technical Design

Charging Interface

Integrated USB charging ports in each bay

Thermal Management

Built-in ventilation slots to prevent overheating

Construction & Security

Security Features

- Locking door mechanism
- Individual bay organization
- Impact-resistant metal housing

Frame Material

Durable robust steel construction

Mobility

Mobility Features

Heavy-duty Casters • Portable Design

Applications

Recommended Environments

- Educational Institutions (Schools)
- Corporate Offices
- Shared Workspaces
- Training Centers
