Product Overview

Reliable Lighting Component

The 5400 Lamp Holder is a robust and reliable lighting component designed for secure and efficient lamp installation. Constructed from durable, heat-resistant thermoplastic and high-conductivity metal, it ensures longevity and safety in various lighting applications. Its design incorporates a threaded base for easy installation and compatibility with standard lighting fixtures.

Technical Specifications

Internal Components

- Copper parts
- Aluminum lamp coil

Housing Material	PBT (Polybutylene Terephthalate)
Mounting Type	Threaded base

Features & Benefits

Application Suitability

Residential Lighting • Commercial Lighting

Key Features	Heat-resistant, Durable construction, Secure installation, High-conductivity contacts
