

# 545W Monocrystalline PERC Solar Panel

This high-efficiency monocrystalline PERC solar panel is designed for utility-scale solar power plants. With advanced cell technology for enhanced energy yield, it provides a 545W power output and long-term reliability.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Solar Power

This 545W monocrystalline PERC solar module is engineered for maximum energy yield in utility-scale and commercial solar projects. Utilizing advanced half-cut cell technology, it provides superior power density and long-term durability in diverse environmental conditions. Its robust construction ensures reliable performance, making it a cost-effective choice for large-scale sustainable energy installations.

## Performance Metrics

### Rated Power Output

**545 W**

Power Output

## Technical Specifications

Cell Technology	Monocrystalline PERC
Module Design	Half-cut cell technology
Suitable Applications	Utility-scale, Commercial, Residential

## Build Quality

### Durability Features

- Robust construction for harsh environments
- High power density design
- Enhanced durability through half-cut architecture
