

5.5 HP to 16 HP Gasoline Engine

This gasoline engine is designed for power generation and other applications needing a reliable power source. It delivers between 5.5 HP and 16 HP and is designed for durability and efficient fuel consumption.

Overview

Reliable Power Solution

This versatile single-cylinder gasoline engine is engineered for a wide range of demanding applications, including power generation, water pumping, and agricultural machinery. Featuring an efficient overhead valve (OHV) design and robust air-cooling, it delivers consistent performance while maintaining optimal operating temperatures. Designed for durability in tough environments, it includes essential safety features such as a low-oil shutdown system to protect the engine during operation.

Performance

Power Output Range

5.5 HP

Minimum Power

16 HP

Maximum Power

Engine Models

168F, 188F

Technical Specifications

Engine Type	Single-cylinder, 4-stroke
Cooling System	Air-cooled
Valve Configuration	Overhead Valve (OHV)
Starting System	Recoil Starter

Safety & Control

Safety Features

- Low-oil shutdown protection
- Integrated engine switch
- Protector for control panel

Safety Equipped

Yes
