

# 55-Inch Ultra-Narrow Bezel LCD Splicing Display

This 55-inch LCD splicing display features an ultra-narrow bezel design, allowing for seamless video wall integration. It offers high brightness, a high contrast ratio, wide viewing angles, and multiple input/output interfaces.

## Overview

### Professional Splicing Display Solution

This 55-inch LCD splicing display features an ultra-narrow bezel design, engineered specifically for seamless video wall integration. It delivers high brightness and a high contrast ratio to ensure visual clarity in demanding environments. With wide viewing angles and versatile connectivity, it is an ideal choice for control rooms, broadcast studios, and high-impact digital signage applications.

## Display Performance

### Key Performance Metrics

**178 degrees**
