Overview

Versatile Dual-Fuel Power Solution

This portable generator offers a flexible power solution, capable of running on both gasoline and LPG. Engineered for reliability, it provides substantial peak and running wattage to support various professional and emergency power needs. The unit is designed for ease of use, featuring a fuel selector switch, integrated voltmeter, and robust circuit protection for both AC and DC outputs.

Technical Specifications

Engine Specifications

Attribute	Value
Horsepower	13.0 HP
Fuel Types	Gasoline, LPG

Battery System

- 12V 15Ah/20Hr Capacity
- Rechargeable Sealed Lead-Acid
- Non-spillable design

Electrical Output

DC Output	12V 8.3A
Safety & Control	Voltmeter, AC Circuit Breaker, DC Circuit Breaker, Fuel Selector Switch

Compliance

Certifications

CE • Pb (Lead-Free Compliance)
