Overview

High-Performance Portable Diesel Power

This portable open-frame diesel generator is engineered for reliable, high-capacity power delivery on job sites and in demanding outdoor environments. Featuring a robust construction with a reinforced fuel tank for safe transport, it delivers 5.0kW of running power and 5.5kW of starting power. The unit combines high-efficiency copper-wound alternator technology with an environmentally friendly 12V battery system to ensure consistent, long-lasting performance.

Performance Metrics

Power Output

5.5 kW

Starting Output

5 kW

Running Output

Fuel Tank Capacity

18 L

Runtime at Max Load

8+ hours

Technical Specifications

Available Sockets

- 16A Socket
- 32A Socket

Alternator Winding

100% Copper

Battery System

12V Environmental Friendly

Features

Safety & Control

Feature	Status
Low Oil Alert	Included
Overload Protection	Included
Circuit Breaker	Included

Key Features

Open Frame Design, Low Noise Generation, Overload Protection, Low Oil Shutdown, Reinforced Fuel Tank
