Product Overview

High-Capacity LPG Transport Solution

This 3-axle semi-trailer is engineered for the safe and efficient long-distance transportation of Liquefied Petroleum Gas (LPG). With a massive 55,000-liter capacity and a robust Q345R carbon steel tank, it provides a reliable solution for high-volume fuel distribution. The trailer is equipped with comprehensive safety systems, including emergency shut-off devices and high-precision monitoring instruments, ensuring compliance with international transport standards.

Key Performance Metrics

Key Performance Metrics

55000 L
Tank Capacity

23 Tons
Max Payload

1.77 Mpa
Design Pressure

Tank Specifications

Tank Material	Q345R carbon steel
Dimensions	12700 * 2500 * 3975 mm
Design Working Temperature	-20 to +50

Chassis & Components

Axle	FUWA
Tire Size	12R22.5
Suspension	Mechanical Suspension
Landing Gear	28T Manual Operating

Safety & Accessories

Safety Equipment

- Emergency shut-off device
- Safety valve
- Pressure gauge
- Thermometer
- Loading & unloading valves
- Reflective safety stripes
- Standard tool box

Compliance & Logistics

Order Lead Times

Order Quantity	Lead Time
1-3 Sets	35 days
> 3 Sets	To be negotiated

Shipping Details

- Packing: Nude, waxed before delivery
- Mode: Sea freight
- Port: Shanghai or any China port
- Supply Ability: 100 units per month

Certifications

ISO9001, CCC
