

55mm Jigsaw Power Tool

This 55mm jigsaw is a versatile power tool designed for cutting various materials with precision. Its compact design allows for easy maneuverability in tight spaces and features a quick-release blade change system for convenience and safety.

Overview

Precision Cutting Power

The 55mm Jigsaw is a versatile power tool engineered for precision cutting across a variety of materials. Designed with a robust motor, it ensures efficient operation for both professional and DIY applications. Its compact, ergonomic design and adjustable base make it ideal for intricate work and tight spaces, while the quick-release blade system enhances safety and convenience.

Technical Specifications

Cutting Capacity

55 mm

Max Cutting Depth

Usability

- Robust motor for efficient operation
- Ergonomic comfortable grip
- Easy maneuverability in tight spaces

Key Features

Adjustable Base, Bevel Cutting, Quick-Release Blade Change, Compact Design
