Overview

High-Efficiency DC Ceiling Fan

This 56-inch ceiling fan is engineered for versatile, energy-efficient cooling in both residential and commercial environments. Powered by a 12V DC brushless motor, it is perfectly suited for off-grid applications, solar setups, or areas with limited AC power. With its wide-angle air supply and 5-level speed control, it provides reliable and customizable comfort.

Technical Specifications

Motor Technology	DC Brushless
Blade Span	56 inch
Power Consumption	36 W
Maximum Speed	320 RPM
Compatible Power Sources	12V DC, Solar Panel, AC 220V (via adapter)
