

# 56kW Heavy-Duty Diesel Engine

This heavy-duty engine features a Ricardo design for enhanced performance. It is engineered for low fuel consumption and high reliability, ensuring long-term durability.

## Overview

### High-Performance Diesel Power

This heavy-duty diesel engine is engineered to deliver reliable 56kW power output for demanding industrial applications. Designed for durability and consistent performance, it serves as a robust solution for machinery requiring stable and continuous power generation. Its compact yet heavy-duty architecture makes it an ideal choice for integration into various industrial systems.

## Technical Specifications

### Rated Power Output

**56 kW**

Power Output

### Engine Type

Heavy-Duty Diesel

## Application Features

### Primary Applications

Industrial Machinery, Power Generation, Heavy-Duty Operations
