

58.8V 8A Lithium-Ion Battery Charger for Electric Vehicles

This lithium-ion battery charger is designed for electric motorcycles and scooters. It provides a charging voltage of 58.8V and delivers an 8A charging current for efficient performance.

Overview

Professional Electric Vehicle Charging Solution

This high-performance battery charger is engineered for 48V electric vehicle systems, including motorcycles, scooters, and e-bikes. Housed in a durable aluminum alloy casing with an integrated cooling fan, it ensures efficient heat dissipation and reliable performance during operation. The unit supports versatile battery chemistries and provides clear visual feedback through LED status indicators, making it an essential component for maintaining your electric vehicle fleet.

Technical Specifications

Performance Metrics

500 W

Output Power

58.8 V

Output Voltage

8 A

Output Current

Input Voltage

- 110-132VAC
- 200-264VAC

Supported Battery Types

Li-ion, LiFePO4, Lead Acid

Physical Characteristics

| | |
|------------------|------------------|
| Dimensions | 173 x 90 x 63 mm |
| Net Weight | 1.1 kg |
| Housing Material | Aluminium Alloy |

Compliance & Warranty

Certifications

CE

Warranty

12 months

Applications

Compatible Vehicles

- Electric Motorcycle
- Scooter
- E-bike
