Product Overview

High-Deterrence Anti-Theft Solution

This 58KHz security tag provides a dual-layer defense for retail merchandise by combining electronic article surveillance with a physical ink deterrent. Designed for high-risk items in supermarkets and clothing stores, the tag features internal ink vials that rupture if tampered with, staining the product to prevent unauthorized removal. Its robust magnetic locking mechanism and durable ABS construction make it an essential tool for reducing inventory shrinkage.

Technical Specifications

Operating Frequency	58KHz, 8.2MHz
Unit Dimensions	42mm Diameter x 30mm
Locking Mechanism	Magnetic Locking

Security Features

Features:

- Beautiful design: transparent or hollow
- There's ink inside. If someone attempt to destroy it by force, it will splash into the commodities.
- Very hard to pry open.
- Even if we don't make the frequency, it still can be used based on the principle of physical anti-theft.
- Can be printed warning signs to deterrent.

Deterrent Method

- Internal ink vials for staining
- Electronic alarm triggering
- Physical tamper resistance
- Visual warning signs

Physical & Chemical Deterrence

The tag is engineered to be extremely difficult to pry open. In the event of forced removal, the internal ink splashes onto the commodity, rendering it unsellable and identifying it as stolen property. Even without an active EAS frequency system, the tag serves as a powerful physical deterrent.

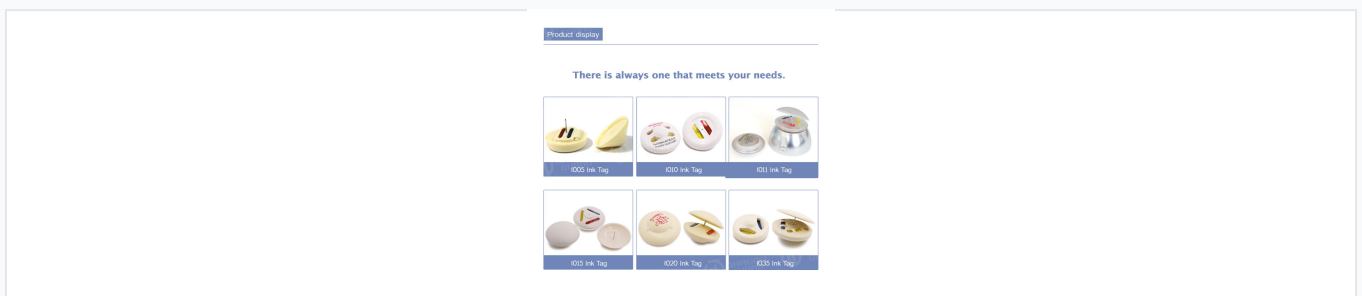

Physical Characteristics

Available Colors	Beige or Customized
Pin Shaft Options	Smooth Pin, Grooved Pin
