

5BB Monocrystalline Silicon Solar Cell

125x125mm

This 5" monocrystalline silicon solar cell is designed for solar module assembly. It features silver bus bars and a blue silicon nitride antireflection coating on the front, with silver/aluminum bus bars and full-surface aluminum BSF on the back.

Product Overview

High-Efficiency 5BB Monocrystalline Cell

This high-performance monocrystalline silicon solar cell features a 5-busbar (5BB) design, engineered for superior energy conversion and long-term durability. Measuring 125x125mm, it offers excellent performance even in low-light conditions, making it an ideal choice for residential, commercial, and utility-scale solar projects. Its optimized architecture ensures reliable power output for high-quality module assembly.

Technical Specifications

Dimensions	125 x 125 mm
Cell Technology	Monocrystalline Silicon
Busbar Design	5 BB

Application

Recommended Uses	Residential, Commercial, Utility-scale
