

5HP Cassette Type Air Conditioning Unit

This cassette-type air conditioning unit is typically installed in ceilings for efficient cooling of larger spaces. The 5HP (horsepower) rating suggests a substantial cooling capacity suitable for medium to large-sized rooms or areas.

Overview

High-Capacity Ceiling Cooling Solution

This 5HP Cassette Type Air Conditioning Unit is designed for discreet and powerful climate control in medium to large-sized commercial or residential spaces. The system features a ceiling-mounted indoor unit for balanced air distribution, paired with a robust outdoor compressor for efficient heat exchange. With its substantial horsepower rating, it provides reliable cooling performance while maintaining a clean aesthetic through its recessed installation.
