Product Overview

Reliable Portable Power Solution

This 5kW diesel generator is engineered for versatility and dependable performance in diverse environments, from residential backup to demanding construction sites. Featuring a silent operation design and robust construction, it provides a stable power supply with both AC and DC output capabilities. The unit is equipped with essential safety features, including automatic voltage regulation and low oil shutdown protection, ensuring consistent and safe operation.

Technical Specifications

Rated Power Output

5 kW

Rated Power

Electrical Configuration

Output Type	Specification
AC Voltage	230V
Frequency	60Hz
DC Output	12V / 8.3A

Engine & Operational Features

- Air-cooled diesel engine
- Electric start system
- Automatic Voltage Regulation (AVR)
- Low oil shutdown protection

Certifications & Quality

Compliance	CE, ISO 9001
