

5kW Gasoline Generator

This gasoline generator delivers portable power with a 4000W rated output and a 5000W maximum. Its 93-liter fuel tank ensures extended operation, while standard AC output and a voltmeter enhance usability.

Product Overview

Portable Power Solution

This gasoline-powered generator is designed to provide reliable, portable electricity for a variety of applications. With a compact 87cc engine, it delivers a rated power output of 900W and a maximum power of 1100W. The unit features a 6-liter fuel tank, ensuring a duty cycle of up to 6 hours, making it an efficient choice for short-term power needs.
