

5kW Gasoline Generator with AVR

This gasoline generator delivers 5kW of power. It features an automatic voltage regulator to maintain stable voltage output.

Overview

Reliable Power Generation

This 5kW gasoline generator is engineered for durability and consistent performance in demanding environments. Featuring an advanced Automatic Voltage Regulator (AVR), it ensures stable power output with a Total Harmonic Distortion (THD) of less than 3%, making it suitable for sensitive equipment. The unit is built for ease of use and longevity, incorporating a robust frame, low-noise muffler, and a low-oil protection system to safeguard your investment.

Performance & Output

Rated Power

5 kW
Power Output

Voltage Regulation

AVR (Automatic Voltage Regulator) with THD < 3%

Safety & Protection

Safety Systems

Overload Protection, Short-circuit Protection, Low Oil Protection

Design & Build

Build Quality

- Thick and large pipe frame for chassis protection
- Integrated wheels for easy mobility
- Advanced ventilating system for lower alternator running temperature
- Newly designed muffler for noise reduction

Maintenance & Operation

Maintenance & Control

- Multi-indication digital meter
- Easy-maintenance air filter design
- Advanced recoil starter for better cooling performance
