

5kW Industrial Fan Heater

This industrial fan heater has a 5kW heating capacity and adjustable thermostat control. It is designed for efficient space heating in workshops, garages, and construction sites.

Product Overview

Professional Industrial Heating Solution

This 5kW industrial fan heater is designed for demanding environments such as workshops, garages, and construction sites. Built with a robust, heavy-duty metal housing, it offers reliable performance and portability with a built-in carrying handle. The unit prioritizes safety and efficiency, featuring thermal protection, tip-over auto-off, and adjustable thermostat control for precise temperature management.

Technical Specifications

Heating Capacity

5 kW Power Output

Controls & Indicators

- Adjustable Thermostat
