Product Overview

Efficient Hot Water On-Demand

This 5L flue type gas water heater is engineered for reliable domestic hot water supply, featuring zero water pressure start-up technology that makes it ideal for areas with low or unstable water pressure. Its compact design allows for versatile installation, while integrated safety mechanisms like flame failure and overheat protection ensure peace of mind. Designed for efficiency and ease of use, this unit provides adjustable temperature and flow controls to meet your specific daily needs.

Performance Metrics

Rated Heat Loading

10 KW

Heat Loading

Hot Water Capacity

5 kg/min

Capacity

Technical Specifications

Rated Gas Pressure

- 280 Pa
- 2000 Pa
- 1000 Pa

Compatible Gas Types

LPG, NG, TG

Flue Pipe Diameter

90 mm

Applicable Water Pressure

0.02MPa - 0.8MPa

Physical Dimensions

Product Dimensions

440 x 330 x 135 mm

Safety & Features

Safety Protections

Flame Failure Protection • Overheat Protection • Zero Water Pressure Start
