

5L Plastic Bottle Blowing Machine

This 5L bottle blowing machine is designed for efficient and high-volume production of plastic bottles. It features a robust frame, precise mold clamping mechanisms, and advanced control systems for optimized operation.

Overview

High-Efficiency Bottle Production

This 5L bottle blowing machine is engineered for the efficient and high-volume production of plastic bottles. Featuring a robust frame and precise mold clamping mechanisms, it ensures consistent quality across every unit produced. The system includes an advanced control interface, allowing for easy monitoring and parameter adjustments to optimize your manufacturing output.

Technical Specifications

Automation Level

Full-Auto

Key Features

- Robust frame construction
- Precise mold clamping mechanism
- Advanced control system
- Multiple blowing stations
- User-friendly interface

Maximum Bottle Capacity

5 L
