

5m Self-Locking Tape Measure

This 5m tape measure features a self-locking mechanism and ergonomic design. It is ideal for various measuring tasks in construction, woodworking, and DIY projects, and features a clear, easy-to-read scale for precise measurements.

Product Overview

Professional Self-Locking Tape Measure

The CR-G51 model is a 5-meter self-locking tape measure designed for durability and precision in construction and woodworking environments. Its ergonomic build ensures comfortable handling during repetitive use, while the integrated self-locking mechanism provides enhanced control and safety during measurement tasks. Featuring a clear, easy-to-read scale, this tool is engineered to deliver accurate results for professional-grade projects.
