

5T Excavator Tilt Bucket

This 5T tilt bucket is designed for excavators, providing precise control for grading and material handling. Its hydraulic tilting mechanism and robust steel construction ensure durability and efficient operation.

Overview

Versatile Excavator Tilt Bucket

The 5T Excavator Tilt Bucket is a robust, heavy-duty attachment engineered for precision grading, contouring, and material handling. Featuring a powerful hydraulic tilting mechanism, this bucket allows for seamless left and right adjustments, making it ideal for complex tasks like slope trimming, waterway dredging, and ditching. Built from high-strength, wear-resistant steel, it is designed to withstand demanding construction environments while maintaining operational efficiency.

Technical Specifications

Compatible Carrier Weight

5 T

Carrier Weight

Key Features

Hydraulic Tilting, Changeable Cutting Edge, High-Strength Steel, Wear-Resistant

Applications

Primary Applications

- Slope-surface trimming
- Waterways dredging
- Water ditching
- Grading and leveling
- Contouring
