

5W LED Light Source Module

This is a 5W LED light source module. It features a compact square form factor and integrated heat sink.

Product Overview

High-Intensity LED Module

This 5W LED light source module is engineered for high-performance illumination across a variety of industrial and electronic applications. Its compact, square form factor is optimized for space-constrained designs, while the integrated heat sink ensures effective thermal management for long-term reliability. Featuring accessible solder pads for straightforward electrical integration, this module provides an energy-efficient solution for professional lighting projects.

Technical Specifications

Power Rating

5 W

Power Consumption

Form Factor

Compact Square

Thermal Management

Yes

Features

Suitable Applications

Industrial Lighting, DIY Projects, Electronic Devices

Connection Method

Solder Pads
