Product Overview

High-Performance Masonry Drilling

This 5x110mm SDS Plus masonry drill bit is engineered for efficient drilling into concrete, brick, and stone. Featuring a durable DK-30 tungsten carbide tip and a robust CR40 steel shank, it ensures precise hole placement and excellent power transmission. The S4 flute design and automatic stove welding construction provide extended tool life and reliability for professional rotary hammer applications.

Dimensions & Geometry

Diameter	5 mm
Overall Length	110 mm

Construction & Materials

Tip Material	DK-30 Tungsten Carbide
Shank Material	40 CR Steel
Manufacturing Process	Automatic Stove Welding
Finish	Brown Finish

Technical Features

Shank Type	SDS Plus
Flute Type	S4 Flute
Tip Configuration	3PT Tip
