

6-20mm Ballnose End Mill Grinder

This is a specialized grinder for ball end mills. Grinding is accurate, rapid, and easy, requiring no prior skill.

Product Overview

Compact and robust design suitable for tool rooms and manufacturing environments.

Precision Ballnose End Mill Grinding

This specialized grinding machine is engineered for the rapid and accurate sharpening of ballnose end mills. Designed for ease of use, it requires minimal operator skill to achieve professional-grade results. With a robust construction and high-performance grinding capabilities, it ensures consistent cutting edge geometry, helping to extend tool life and optimize machining performance in professional workshop environments.

Technical Specifications

1 Spindle switch
 2 Right hand grinding wheel
 3 Grinding wheel guard
 4 Grinding wheel guard
 5 Grinding wheel guard
 6 Grinding wheel guard

Detailed view of machine controls, including transverse feed plate and fine-tuning mechanisms for precise geometry adjustment.

Machine Specifications

Feature	Detail
Model	MR-X8
Power	220V / 250W
Spindle Speed	4400 rpm
Dimensions	60 x 29 x 37 cm
Weight	40 kg

Tool Compatibility

Precision collet design for secure tool holding and concentricity during grinding operations.

Processing Capacity

6 mm

Minimum Diameter

20 mm

Maximum Diameter

Included Collets

- 6
- 8
- 10
- 12
- 14
- 16
- 18
- 20

Grinding & Performance

High-precision accessories including diamond grinding wheels and collet chucks designed for optimal material removal.

Grinding Wheel Compatibility

SDC (Standard for Carbide), CBN (Optional for HSS)
