

6-Axis Industrial Robot 6kg Payload 1490mm Reach

This 6-axis industrial robot is designed for applications such as welding, material handling, and machine tending. It has a payload capacity of 6 kg and a reach of 1490 mm.

Product Overview

High-Performance 6-Axis Industrial Robot

This 6-axis industrial robot is engineered for high precision and repeatability in demanding manufacturing environments. With a 6kg payload capacity and a 1490mm reach, it offers the flexibility needed for complex tasks like welding, material handling, and assembly. Its compact design and advanced control systems ensure seamless integration into existing production lines, helping to increase operational efficiency and reduce costs.

Key Performance Metrics

Payload Capacity

6 kg

Payload

Maximum Reach

1490 mm

Reach

Technical Specifications

Number of Axes

6

Application Areas

Process Capabilities

- Welding
- Material Handling
- Assembly
- Machine Tending

Suitable Industries

Automotive, Motorcycles, Agricultural Machinery, Engineering Machinery, Hardware Welding
