

## 6-Gang Rocker Switch Panel with Dual USB and Voltmeter

This 6-gang rocker switch panel is designed for 12V systems and features dual USB charging ports and a voltmeter. It is waterproof and includes LED-illuminated rocker switches with glow labels.

### ADDITIONAL IMAGES

### Product Overview

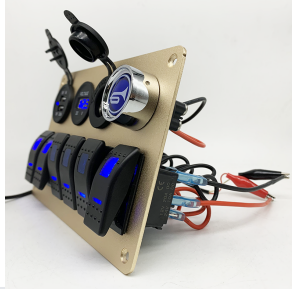

Front interface featuring 6 switches, dual USB ports, and digital voltmeter.

### Integrated 6-Gang Control Solution

This 6-Gang Rocker Switch Panel is a comprehensive electrical control center designed for 12V and 24V DC systems in marine, automotive, and RV applications. It features a high-durability aluminum faceplate equipped with six LED-illuminated switches, dual USB charging ports, and a real-time digital voltmeter for battery monitoring. The waterproof design and glow-in-the-dark labels ensure reliable operation and easy identification in all environmental conditions.

## Electrical Specifications

Certified for 12V 20A and 24V 10A DC operation.

### Rated Current

**20 A**

at 12V DC

**10 A**

at 24V DC

### Operating Voltage

12VDC / 24VDC

## Charging & Monitoring

Integrated 5V 1A and 2.1A USB ports with protective rubber caps.

### USB Charging Ports

- Port 1: 5V 1A
- Port 2: 5V 2.1A

### Voltage Monitoring

Digital LED Display (Red/Blue)

## Switch Details

Switch Function	SPST ON-OFF Rocker
Pin Configuration	5 pins
Indicator Light	Blue LED Light

## Materials & Durability

Each switch is designed with waterproof seals for harsh marine environments.

### Protection Features

- Waterproof construction
- Dust and debris resistant rubber covers
- Flame retardant materials
- Glow-in-the-dark labels

### Materials

Aluminium, ABS Plastic, Metal

## Operating Environment

### Operating Temperature

-25°C to +85°C

## Application

Versatile control center suitable for a wide variety of vehicle electronics.

### Target Applications

Car • Marine • Boat • RV • Motorcycle • Bus • Trailer
