Product Overview

High-Efficiency Elastic Cord Knitting

This high-speed knitting machine is precision-engineered for the mass production of elastic flat mask cords and earloop cords. Equipped with 6 independent knitting heads and 24 needles per head, it enables simultaneous, high-volume manufacturing with consistent diameter and elasticity. The system features an intuitive digital control panel for monitoring production parameters, ensuring operational flexibility and reliable industrial performance.

Technical Specifications

Knitting Heads	6 heads
Needles per Head	24 needles
Model Identifier	HHJ1-F

Operational Features

Production Metrics

6 heads

Simultaneous Production Lines

24 needles/head

Needle Density

Control Panel Functions

Digital Counter, Run, Stop, Jog, Set, Breakage Detection

Applications

Compatible Products

- Elastic flat mask cords
- Earloop cords
- Apparel accessories
- Textile components
