Product Overview

High-Performance Dewatering Solution

This 6-inch self-priming centrifugal diesel pump set is engineered for demanding fluid transport and dewatering tasks. Designed to handle water containing abrasive solids, it is ideal for construction sites, mining operations, flood control, and municipal sewage applications. The integrated silent-type enclosure ensures operational efficiency while significantly reducing noise pollution, making it suitable for both remote industrial sites and urban environments.

Technical Specifications

Pump Size	6 inch
Pump Type	Centrifugal Self-Priming
Power Source	Diesel Engine
Enclosure Type	Silent Type

Applications

Primary Applications	Construction Dewatering, Mining, Sewage Transfer, Flood Control, Municipal Applications, Stream Diversions
----------------------	--

Key Features

Operational Features

- Self-priming capability for quick startup
- Handles water with abrasive solids in suspension
- Silent enclosure for noise reduction
- Robust construction for durability
- User-friendly control panel
- Built-in safety features
