

6-Inch Junior Hacksaw with Steel Frame

Compact hacksaw designed for use in tight spaces and on smaller projects. It features a chrome-plated steel frame and includes six 6-inch, 24 TPI blades.

Product Overview

Precision Cutting Performance

The 6-inch junior hacksaw is a specialized tool designed for detailed and intricate cutting tasks. Featuring a lightweight steel frame and a comfortable handle, it offers excellent maneuverability for fine work. This versatile tool is ideal for model making, craftwork, and general DIY projects, providing clean, precise cuts on materials like plastic, thin metal sheets, and wood.
