

# 6-Inch Pneumatic Self-Vacuuming Sander

This 6-inch air sander is designed for self-vacuuming, enhancing user experience and maintaining a cleaner workspace. It is a pneumatic tool suitable for sanding applications in woodworking, automotive, and surface preparation tasks.

## ADDITIONAL IMAGES

## Product Overview

### Professional 6-Inch Pneumatic Sander

This professional-grade 6-inch pneumatic sander is engineered for high-performance surface preparation and finishing. Featuring a heat-treated eccentric shaft and high-quality industrial components, it offers exceptional durability and precision. The low-center-of-gravity, lightweight design minimizes vibration and user fatigue, making it ideal for extended use in demanding industrial environments.

## Key Features

### Key Features

- Self-vacuuming system for dust collection
- Heat-treated eccentric shaft for durability
- High-quality bakelite rotor blade
- Industrial-grade bearing for long service life
- Low-vibration design for swirl-free finishes

## Technical Specifications

|                  |        |
|------------------|--------|
| Sanding Pad Size | 6 inch |
|------------------|--------|

## Applications

|          |   |
|----------|---|
| Best For | Automotive Body Work, Woodworking, Metal Finishing, Weld Processing, Rust Removal |
|----------|---|

## Design & Ergonomics

### Design Benefits

Lightweight • Low Vibration • Low Center of Gravity
