

6-Inch Self-Vacuuming Air Sander

This 6-inch air sander is designed with a self-vacuuming system for efficient material removal. Its powerful air motor ensures consistent performance while minimizing dust and debris.

Product Overview

Professional 6-Inch Self-Vacuuming Air Sander

This 6-inch professional air sander is engineered for high-performance surface preparation and material removal. Designed with a low center of gravity and perfectly balanced sanding pad, it minimizes vibration to ensure swirl-free finishes even during extended use. Its robust construction features an industrial bearing and heat-treated eccentric shaft, making it a reliable tool for demanding automotive, woodworking, and metalworking tasks.

Technical Specifications

Construction Highlights

- Heat-treated eccentric shaft
- High-quality bakelite rotor blade
- Industrial-grade bearing
- Low-vibration design
- Low center of gravity

Sanding Pad Size	6 inch
------------------	--------

Applications

Best For	Vertical Sanding, Overhead Sanding, Welding Slag Removal, Rust Removal, Metal Processing
