

6-Inch Stainless Steel Ruler

This stainless steel ruler measures 6 inches or 150mm in length. It features precise millimeter and centimeter markings and is made from durable, corrosion-resistant stainless steel.

Product Overview

Professional Grade Stainless Steel Ruler

This 6-inch stainless steel ruler is a versatile tool designed for precision measurement in engineering, drafting, and general workshop applications. Constructed from durable, corrosion-resistant stainless steel, it ensures long-term reliability and accuracy. The dual-scale design features both metric and imperial markings, providing flexibility for diverse project requirements.

Physical Dimensions

Length (Metric)	150 mm
Length (Imperial)	6 in
Width	19 mm
Thickness	0.8 mm

Technical Specifications

Material	Stainless Steel
Measurement Systems	Metric, Imperial

Applications

Common Applications

- Engineering
- Drafting
- General Measurement
