

# 6-Inch Submersible Water Pump, 50Hz

This submersible pump has a 6-inch diameter and operates at 50Hz. It delivers water efficiently, as indicated by performance curves for head, flow rate, efficiency, and NPSH.

## Product Overview

### High-Efficiency 6-Inch Submersible Pump Series

This 6-inch submersible pump series is designed for reliable water handling at 50Hz, featuring optimized performance curves for head, efficiency, and NPSH. The series offers versatile power options ranging from 3.00 kW to 22.00 kW, suitable for both 4-inch and 6-inch motor configurations. With a robust design and precise engineering, these units provide consistent flow and head pressure for demanding professional applications.
