

6-Inch Submersible Water Pump

These 6-inch submersible pumps are available in multiple models. They offer varying power, head, and capacity to suit different applications.

Product Overview

High-Performance 6-Inch Submersible Pumps

The 6TR series offers a comprehensive range of 6-inch submersible pumps designed for efficient water management. These units are engineered for high-performance operation, featuring a wide variety of power, head, and capacity configurations to suit diverse industrial and agricultural applications. With a standardized rotational speed of 2850 r/min, these pumps deliver consistent, reliable flow rates across all models.

Technical Specifications

Pump Size	6 inch
Rotational Speed	2850 r/min

Performance Range

Power Range	3 kW to 22 kW
Capacity Range	5 m ³ /h to 63 m ³ /h
Efficiency Range	58% to 68%

Model Selection

Available Pump Models

Model	Power (kW)	Head (m)
6TR5-100	3	100
6TR15-108	9.2	108
6TR20-26	3	26
6TR32-18	3	18
6TR40-36	7.5	36
6TR50-32	7.5	32
6TR63-12	4	12
