

6 MW Ground-Mounted Solar Energy System

This is a ground-mounted solar energy system with a 6 MW capacity. The photovoltaic panels are arranged to maximize sunlight capture.

Overview

6 MW Utility-Scale Solar Installation

This 6 MW ground-mounted solar energy system represents a robust solution for large-scale renewable energy generation. Located in Suvereto, Italy, the installation has been fully operational since April 2011. Designed for optimized sunlight capture, the array utilizes a durable support structure to ensure long-term stability and performance in utility-scale applications.

Technical Specifications

System Capacity

6 MW

System Size

Mounting Configuration

Ground-Mounted

Completion Date

April 2011

Installation Site

Suvereto, Italy
