

6" Submersible Pump

This submersible pump is designed for water supply from seep wells and agricultural irrigation. It is also suitable for pressure boosting, fire-fighting, and various industrial applications.

Product Overview

High-Performance 6-Inch Submersible Pump

The S6 Series is a robust, semi-axial submersible pump engineered for professional water management in deep wells. Featuring a combination of high-grade stainless steel and durable cast iron components, this unit ensures reliable, corrosion-resistant operation in demanding environments. Its efficient multi-stage hydraulic design optimizes flow and pressure while maintaining low energy consumption, making it an ideal choice for agricultural, municipal, and industrial water supply needs.

Application

Typical Applications

Agricultural irrigation, Industrial water supply, Deep well pumping, Pressure boosting, Fire-fighting

Technical Features

Key Functional Features

- Semi-axial mixed flow hydraulics
- Integrated non-return check valve
- Submersible fluid-cooled motor
- Sand-guard protection
- Corrosion-resistant stainless steel construction
