Overview

Heavy-Duty Cargo Movement Solution

This 6-ton rotating platform cargo trolley is engineered for the efficient relocation of heavy machinery, tanks, and industrial equipment. Featuring a robust steel construction and an integrated rotating top plate, it allows for precise positioning and smooth steering in demanding industrial environments. Designed for reliability, this trolley provides a stable foundation for moving heavy loads safely and effectively.

Performance Specifications

Load Capacity

6 Tons

Maximum Load Capacity

Steering Mechanism

Rotating top plate for easy positioning
