Overview

USAGE

Each fuse of fuse box can be connected to any circuit of vehicle accessories, for example: car dome light, auto headlight, auto lamp, fog lamp, warning light, car refrigerator, car charger, and car fan, etc. When the current is too high, the fuse will be blown. Therefore, to avoid electrical safety hazards, it is necessary to install electrical appliances on vehicle.

Versatile installation suitable for car lighting, electronics, and accessories.

Professional 6-Way Circuit Protection

This waterproof 6-way blade fuse block is engineered for demanding automotive, marine, and industrial electrical systems. Supporting 12V, 24V, and 32V configurations, it provides an organized and secure way to protect up to six independent circuits. The integrated LED fault-indicator system allows for rapid identification of blown fuses, significantly reducing downtime during maintenance.

Technical Specifications

Different fuse colors correspond to specific current ratings for easy identification.

Input Ratings

75 A

Rated Input Current

32 V DC

Max Input Voltage

Terminal and Wiring

Connection Type	Hardware	Wire Gauge
Main Input	M6 Stud	#4-6 AWG
Output Circuit	M4 Stud	#12-16 AWG

Capacity Per Circuit	20 A
Compatible Fuse Types	ATO, ATC

Construction

WHAT WILL YOU RECEIVE?

The kit includes the fuse block, mounting hardware, 70 labels, and a selection of fuses.

Materials Used

- Base: PA66
- Cap: PC
- Terminals: Nickel-plated copper
- Screws: Stainless steel

Key Features

Waterproof Design • LED Fault Indicator • Clear Protective Cover • Circuit Identification Labels
