Product Overview

Reliable Outdoor Power Disconnect

This metallic AC disconnect fuse box provides a secure and visible method for cutting power to outdoor air conditioning systems. Designed with a durable, rain-proof NEMA 3R enclosure, it ensures safety during maintenance by allowing users to lock the unit in the OFF position. The pullout handle design prevents accidental activation and enhances operational safety for both residential and commercial HVAC applications.

Technical Specifications

Rated Current

60 A

Amperage

Enclosure Type

NEMA 3R • Rain-proof

Wire Compatibility

Aluminum/Copper (Al/Cu), 60°C or 75°C

Short Circuit Current Rating

10,000 Amperes RMS symmetrical, 240V AC max

Features

Safety & Design

- Pullout handle for On/Off control
- Handle storage compartment in OFF position
- Protective shield prevents access while power is connected
- Lockable design for unauthorized access prevention
