

## 600 kg Electric Hoist with Limit Device

Electric hoist designed for lifting loads up to 600 kilograms. It features an up and down limit device for enhanced safety and operational control.

### ADDITIONAL IMAGES

### Overview

#### Professional Lifting Solution

This 600 kg electric hoist is engineered for reliable and safe performance in workshops, construction sites, and industrial environments. It features advanced safety mechanisms, including an emergency stop switch and up/down limit devices, ensuring precise control during operation. Built with thermal protection and an IP54 protection class, this hoist is designed to withstand demanding work conditions while maintaining consistent lifting efficiency.

### Technical Specifications

#### Safety Features

- Emergency stop switch
- Up and down limit device
- Thermal protection device
- Reinforced breaking switch

Load Capacity	600 kg
Protection Class	IP54

### Compliance & Certification

Certifications	CE, GS, EMC, RoHS
----------------	-------------------
