Overview

Robust Hydraulic Crawler Dumper

The 600 kg Hydraulic Mini Crawler Dumper is an incredibly robust material handling solution designed for challenging environments. Featuring a hydraulic transmission system and advanced crawler tracks, it provides superior traction and stability, whether navigating construction sites or muddy fields. Built for efficiency and ease of use, it includes a stand-on stage and a self-unloading mechanism to optimize productivity for professional operators.

Performance

Rated Load Capacity

600 kg

Load Capacity

Lifting Height

1.6 m

Unloading Mechanism

Self-unloading

Technical Specifications

Engine Options

- B&S 13.5HP, 4-stroke
- HONDA GX390 13.5HP, 4-stroke

Transmission System

Hydraulic

Drive Type

Crawler driven

Hydraulic Pump

Gear pump

Design & Features

Drum Finish

Yellow powder coating

Self-Shovel Included

No

Key Operational Features

Stand-on stage, Crawler design, Hydraulic transmission
