Overview

Robust Mini Tracked Dumper

The BY600S is a high-performance hydraulic mini tracked dumper designed for demanding construction and landscaping environments. Featuring a robust crawler-driven system, it offers exceptional stability and traction on mud, uneven terrain, and complex job sites. With a 600kg load capacity and self-unloading functionality, it is engineered to streamline material transport while reducing manual labor requirements.

Performance

Rated Load Capacity

600 kg

Load Capacity

Engine Options: B&S 13HP, GX390 13HP

Engine Type: 4-stroke

Technical Specifications

Transmission System	Hydraulic
Drive Type	Crawler driven
Hydraulic Pump	Gear pump

Design & Features

Operator Features

- Stand-on stage
- Crawler design for complex terrain

Unloading Mechanism

Self-unloading

Drum Finish

Yellow powder coating
