600-Ton Heavy Lift Crane

This is a 600-ton capacity crane used for heavy lifting in construction. It features a robust structure with support towers and advanced lifting mechanisms.

Overview

Industrial Heavy Lift Crane

This 600-ton capacity heavy lift crane is engineered for large-scale industrial and construction operations. Designed to handle extreme loads with precision, it features a robust structural framework capable of supporting demanding lifting tasks. Its advanced engineering ensures stability and reliability in complex site environments, making it an essential asset for heavy infrastructure projects.

Performance Metrics

Rated Lifting Capacity

600 ton
Max Load

Operational Status

Heavy Duty • Industrial Grade • On-Site Ready

Technical Specifications

Structural Configuration	Dual-tower support with horizontal spanning beam
Primary Applications	Shipbuilding, Large-scale Construction, Heavy Infrastructure
