

600cc Inline-Four Cylinder Naked Motorcycle

This naked motorcycle features a 600cc inline-four cylinder, liquid-cooled engine with 4 valves per cylinder and a double overhead camshaft. It delivers 60 kW (82 cv) at 11500 rpm and a maximum torque of 52 Nm (5,3 kgm) at 10500 rpm.

Overview

Performance and Agility

This 600cc naked motorcycle is engineered for both urban commuting and spirited weekend riding. Featuring a high-performance inline-four cylinder engine and a robust trellis frame, it offers a responsive and engaging riding experience. The combination of advanced suspension components and a powerful braking system ensures safety, control, and comfort across various road conditions.

Engine & Performance

Performance Metrics

82 CV

Max Power

52 Nm

Peak Torque
