

600W+ Bifacial Dual Glass Monocrystalline Solar Module

This is a 600W+ bifacial dual glass monocrystalline module. It utilizes advanced cell technology and robust construction to maximize performance and durability.

Product Overview

High-Efficiency Bifacial Module

The 600W+ Bifacial Dual Glass Monocrystalline module is engineered to maximize energy harvest in large-scale solar projects. By utilizing dual glass construction, it ensures superior long-term reliability and environmental resistance. The bifacial design captures sunlight from both sides, providing a significant boost to total power generation compared to standard panels.

Technical Specifications

Rated Power Output

600 W

Peak Power

Construction Details

- Bifacial cell architecture for rear-side power collection
- Dual glass encapsulation for increased mechanical stability
- Optimized for utility-scale solar installations

Key Features

Bifacial, Dual Glass, Monocrystalline, High Efficiency
