

600W Variable Speed Coded Straight Grinder

This straight grinder is equipped with a 600W motor. It features variable speed control, making it suitable for grinding, polishing, and cutting various materials.

Product Overview

Professional Corded Straight Grinder

This 600W straight grinder is engineered for precision tasks in tight and confined spaces. Its well-balanced design features a slender, double-neck die-cast aluminum gear housing, providing both durability and ease of handling. With variable speed control and a comfortable rubber-coated grip, it allows users to achieve optimal results across various materials and applications.

Technical Specifications

Rated Power

600 W

Power Input

Operational Controls

- Variable speed control
- Two-position on/off switch (lockable in both positions)

Design & Ergonomics

Ergonomic Design Elements	Small diameter nose, Rubber-coated gear housing, Soft grip handle, Well-balanced
Housing Material	Die-cast aluminum

Compliance
