Product Overview

Industrial Plasma Cutting Solution

The CUT-60 is a robust inverter-based plasma cutting machine engineered for high-performance industrial metal cutting applications. Designed with precision in mind, it features an integrated current meter for real-time monitoring and adjustable controls for both current output and gas delay. This unit is built to provide reliable, heavy-duty performance for professional metalworking environments.

Technical Specifications

Rated Current

60 A

Rated Output

Adjustable Controls

- Adjustable Current (MIN/MAX)
- Adjustable Gas Delay (MIN/MAX)
